

### Test Scenario

ID	Description
1	Verify Compare button is visible on mouse over on the product tile, for products that has not been added for comparison
2	Verify Remove button is visible on mouse over on the product tile, that has been added for comparison
3	Verify that addition of only one product for comparison does not display anything in the comparison section
4	Verify that addition of atleast two products for comparison displays only those products in the comparison section
5	Verify that addition of atleast two products for comparison displays the exact same value of price in comparison section as in the product tile for the respective products along with some value for Colors and Condition values. Verify Compare button changed to Remove button for these products in product tile.
6	Verify that by clicking on Remove button removes only that product and its respective Price, Colors and Condition values from the comparison section. Verify that after removing product for comparison, it displays Copmare button on mouse over on that product tile
7	Verify that when only two products are added for comparison, clicking Remove button on any of those two products on the product catalogue removes both the products from the comparison
8	Verify that the product image is shadowed and shadow is reset after clicking Compare button and Remove button on product tile respectively
